

# If GECKO can streamline one area of your business, imagine what it can do for your entire organisation:

## Board of Directors / Management Team / DPs

**Streamline managerial functions** by calendarising internal obligations, consolidate/minimise repetitive tasks and have meaningful documented interaction.

Holistic view from one centralised dashboard, clearly demonstrating management of all activities, inc., high quality and **effective oversight** of those activities performed by delegates.

**Customisable workflows** that you and your team can build out to reflect your daily activities for internal governance policies and procedures.

## Other Operational Efficiencies

Cost-cutting opportunity & a greater **focus on higher-value tasks** for all other business areas:

- Operations
- Product
- Development
- Legal
- Compliance
- Capital markets
- Sales team

**Minimise the passing of information and cut out forward and back emails** - Our system being API centric fits around and interacts with your existing systems/software.

**Save valuable time reviewing and approving** endless board reports by using a system to eliminate underlying data and include only the criteria you need - exportable in various file formats.
